SUMMARY

Software Engineer skilled in backend development, REST APIs, real-time systems, and scalable full-stack applications using Python, Node.js, React, MongoDB, and SQL. Experienced in building AI-powered applications, optimizing backend performance, deploying web applications, and designing modular architectures through internships, hackathons, and production-style projects. Strong foundation in Linux, API development, databases, and system design fundamentals

EXPERIENCE

- Full-Stack Developer Intern — Hexinox (Jul 2025 – Jul 2025)
 - Developed REST APIs using Node.js for authentication, product, and cart modules with secure token-based session handling.
 - Optimized NoSQL database queries through schema restructuring and indexed lookups, improving backend response performance during load testing.
 - Implemented WebSockets for real-time synchronization across multiple active user sessions.
 - Added structured validation and centralized error handling to improve backend reliability and debugging.
 - Cybersecurity Intern — CDAC Noida (Aug 2024 – Oct 2024)
 - Performed malware analysis using Cuckoo Sandbox by monitoring system calls, processes, and network behavior.
 - Assisted in sandbox execution, behavioral analysis, and threat profiling workflows for suspicious files.
 - Cybersecurity Trainer — LBSCEK (Mar 2025)
 - Conducted hands-on sessions on Python programming and cryptography concepts for 50+ students.
 - Guided students through practical exercises involving encryption, scripting, and cybersecurity basics.
-

PROJECTS

AI-Powered Home Security System — Surveillance Platform (Python, Flask, React, MongoDB, YOLO) [GitHub](#)

- Developed a scalable surveillance platform supporting live camera streaming, face recognition, human detection, and automated alert triggers.
- Built real-time event communication using WebSockets for instant alert notifications and live system updates.
- Designed modular backend architecture for concurrent video processing and AI inference workflows.
- Achieved end-to-end response latency below 1.5 seconds and reduced false positives by 40% using a hybrid ML + rule-based detection pipeline.

AI Plant Doctor — Full-Stack Web App (Flask + React) [GitHub](#)

- Built a full-stack plant disease diagnosis platform using Flask REST APIs and AI-based image inference pipelines.
- Developed responsive React interfaces supporting image uploads, chatbot interaction, and real-time prediction workflows.

- Optimized backend request handling using asynchronous processing, reducing API latency by 70%.
- Structured modular API architecture to support scalable deployment and future model integration.

AI HR Interviewer — Real-Time Interview Simulator (Flask + NLP) [GitHub](#)

- Developed a real-time interview simulation platform with speech-to-text processing and NLP-based candidate evaluation.
- Built backend workflows for continuous input handling, automated scoring, and response analysis.
- Designed modular APIs for extensible interview evaluation and feedback generation.

Medical Chat Website — Hackathon (PHP, JS) — Secured 2nd Place at MediHack 2024

- Built a real-time doctor–patient communication platform supporting appointment scheduling and medical record storage.
- Implemented dynamic chat functionality and backend workflows for user session handling.
- Secured 2nd place at MediHack 2024 for usability, workflow design, and practical healthcare application.

SKILLS

- Languages: Python, JavaScript, C++, SQL
- Frontend: React.js, HTML, CSS, Tailwind CSS
- Backend: Node.js, Flask, REST APIs, WebSockets, Authentication, JWT
- Databases: MongoDB, MySQL
- Developer Tools: Git, GitHub, Linux, Postman, Render, Netlify, Supabase
- Core CS Fundamentals: Data Structures & Algorithms, Problem Solving, OOP, DBMS, Operating Systems, Computer Networks
- Concepts: Scalable Backend Systems, Real-Time Communication, API Design, Performance Optimization

CERTIFICATIONS

- Machine Learning Specialization (DeepLearning.AI) — 2025
- Cisco Networking Basics
- Infosys Springboard — AI, Deep Learning, NLP, RPA
- Microsoft AI Skills Fest: Manage AI Data Security with Microsoft Purview — 2025

ACHIEVEMENTS

- 2nd Place — MediHack 2024 Hackathon
- Participated in 4 hackathons (team lead in 2)
- Mentored peers in AI/ML & project development

EDUCATION

- B.Tech — Computer Science & Engineering
LBS College of Engineering, Kasaragod — CGPA: 7.21 / 10 (2022 – 2026)
- Plus Two — 93.2% — Peevees Model School, Nilambur (2021)
